

# Auction Problem Set

September 26, 2008

In the spreadsheet AuctionPSData.xls at:

<http://pages.stern.nyu.edu/~jasker/index3.html>

you will find data from 500 two person auctions in which there is no auction level heterogeneity. Use the Guerre Perrigne Vuong estimator to infer the underlying distribution of valuations. Graph this distribution and provide the code you used.

Due Date: Nov 1 2008
