II. Exam Time: 120 minutes.

III. Closed Book except for two 8.5” x 11” page with anything written on both sides. If you are found with more than the allowed surface area of pages, all of your pages will be immediately confiscated. You may also take a calculator (but not a palm pilot) into the exam.

IV. Examinable Material:
   A. Lecture Notes: The Lecture Notes handed out in class form the basis of the examinable material. Use these as your first reference. Particular emphasis will be given to the material emphasized in the lectures. Though the Final Exam is comprehensive, the emphasis will be on the material covered from the CAPM (inclusive) onward.
   B. Problem Sets: Problem Sets 1-5.

V. Both the practice final exam and the 1996 Final Exam (both in the practice questions handed out earlier) are good guides to the likely length of the exam and style of question. If you cannot do these exams in 2 hours then you probably will not be able to do the Final Exam in 2 hours.

IX. The following set of instructions will accompany the Final Exam.
