### Project

*Data Notes...*

There are several very good sites that cater to those who want to learn more about risk and return. If you want a simple site to get a sense of the choices when it comes to risk and return models, try the following:

<http://www.moneychimp.com/articles/risk/riskintro.htm>

Do not get thrown off by the site name. It is a solid source. If you want more extensive academic references, you can find them listed under chapter 3 of the book.

If you are interested, you can look at the Nobel Committee's announcement that it had picked Markowitz, Sharpe and Miller for their contributions to finance:

<https://www.nobelprize.org/prizes/economic-sciences/1990/markowitz/facts/>

You can also link to the lectures that each of them gave.

### *Miscellaneous FAQs*

*When is the quiz again, and is it open book?*

The quiz is on March 4. You can prepare for it by looking at past quizzes, which are accessible here:

[http://people.stern.nyu.edu/adamodar/New\\_Home\\_Page/cfprob0.html](http://people.stern.nyu.edu/adamodar/New_Home_Page/cfprob0.html)

*How do I prepare for the quiz?*

It is early, but you can start working through the problems at the end of chapters 3 and 4.

You will find more practice problems on my web site.

*Will the quiz look just like the practice quizzes?*

Pretty much, but it will have a twist (something you have not seen before).
