Dear Professor Backus,

Just a quick thank you for posting R code on the Penn World Tables. I wanted to have a quick look at the Version 8.0 of the PWT just released and was able to use your code to great effect.

You will note that several variables were renamed since pwt71. As you can see below adapting your code was a breeze.

It looks like PWT has two versions of real gdp now (see brief note below).

Thanks,

Patrick.

http://pages.stern.nyu.edu/~dbackus/BCH/data/PWT/PWT_71.R

```
# PWT Real GDP Data
# Based on Backus (2012)
#
# rgdpe = Expenditure-side real GDP at chained PPPs (in mil. 2005US$)
# rgdpo = Output-side real GDP at chained PPPs (in mil. 2005US$)
