Business Overview

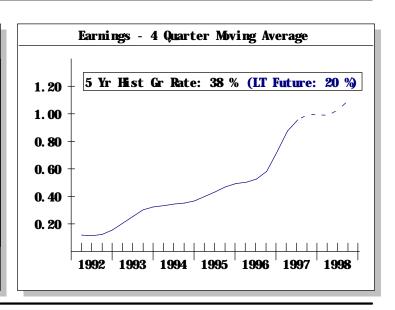

Intel is the world's #1 maker of microprocessors. Its microprocessors -- including the x86, MMX, and Pentium family -- have been providing the brains for IBM-compatible personal computers since 1981. The company also makes computer microcontrollers, random access memory (RAM) cards, networking products like EtherExpress adapters, FastEthernet cards and servers, and conferencing equipment such as the ProShareVideo System. Intel continues to expand and upgrade its products and facilities to maintain its dominance over rival chip makers such as Cyrix and Advanced Micro Devices. In an effort to move into the graphics chips market, Intel agreed to acquire Chips and T
